Notes:

* Assays previously released on August 24

All values are un-cut

True width is estimated to be 65 to 90% of down hole interval

Sample preparation and analyses completed at ALS Minerals in Kamloops and Vancouver

Au by 50 g fire assay with AA finish, or by gravimetric finish for samples over 10 g/t

Cu and Ag by ICP following aqua regia digestion

Samples over 100 g/t Ag or 1% Cu were re-analyzed by AA following 4-acid digestion
